## **Datria Joins Cisco Technology Developer Program**

### **Completes Interoperability Testing**

**Greenwood Village, Colo. – March 30, 2009** – Datria announced that it has joined the Cisco Technology Developer Program as part of the program's Unified Communications Contact Center / Speech and IVR solution category. In addition, Datria's DVA 5.0 has successfully completed interoperability testing with the Cisco VoiceXML Gateway and Unified Customer Voice Portal.

The Cisco Technology Developer Program (<http://www.cisco.com/go/ctdp>) unites Cisco with third-party developers of hardware and software to deliver tested interoperable solutions to joint customers. Members of the program share Cisco's strong commitment to customer service and satisfaction and are required to undergo interoperability testing based on criteria set forth by Cisco. With Cisco Technology Developer Program member offerings such as Datria DVA 5.0, customers can more quickly deploy a broad range of Cisco Compatible enterprise mobility applications that enhance supply chain operations and field force automation via their Cisco network.

\*The interoperability testing is designed to simulate typical customer configurations, and does not replace the need for on-site testing in conjunction with actual implementation.

#### **About Datria Systems**

Datria is a worldwide leader in enterprise class mobility solutions. Datria's solutions use speech recognition technologies to allow employees to access back-end enterprise systems by connecting them directly and in real-time by using their voice and any type of telephone. Datria solution use examples are: warehouse operations, field service management, plant maintenance, enterprise asset management and human capital management. Besides the ability to scale and use Datria's solutions throughout an enterprise, the solutions are network centric, 100% open standards compliant, adhere to Systems Oriented Architectures (SOA) and can leverage investments being made in VoIP. Benefits of Datria's mobility solutions include increased order fulfillment accuracy, improved worker productivity, enhanced safety and job satisfaction, reduced operations costs, and increased customer satisfaction – all at a much lower total cost of ownership than traditional mobility solutions. Founded in 1997 and a member of the VoiceXML Forum, Datria is based in Greenwood Village, Colorado. For more information, please visit <http://www.datria.com> or call +1 800.583.9509.
